Kitchen + Laundry

Choosing your sink.

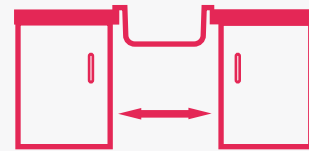

Installation type.

Overmount or Undermount? An overmount sink is a traditional drop-in style sink with a lip that sits over the benchtop; is easy to install and is suitable for all benchtops. An undermount sink is installed underneath the benchtop and requires a solid surface like granite, marble or engineered stone.

Cabinet size.

Check that your cabinet is wide enough (left to right) and deep enough (front to back) to accommodate your chosen sink.

Bowl & drainer configuration.

There are numerous bowl and drainer configurations to choose from when selecting your kitchen sink and your choice will ultimately affect the function of your kitchen. The drainer and bowl location is also an important consideration as most sinks are available in left hand or right hand bowl configurations. Consider which option will work best in your space.

Single bowl sinks

A great fit for small kitchens, alfresco or butler's pantries. Available in overmount or undermount.

Double bowl sinks

A great fit for larger kitchens while maintaining a minimalist (drainer free) look.

Single bowl sinks with drainer

For smaller kitchens, studios or butler's pantries with the need for a handy drainage or prep area.

1.75 bowl sinks with drainer

A practical second bowl makes this an ideal sink for busy kitchens.

1.5 bowl sinks with drainer

Add a little more functionality. Perfect for those who need a little extra sink space or a rinsing bowl.

Double bowl sinks with drainer

An ideal working space for family sized kitchens and those who love to cook.

Bowl size.

While small bowls might take up less bench space, make sure you have a large enough bowl to suit your needs.

Contents.

Designed and engineered in Australia with over 75 years of experience and a lifetime warranty*, you can be confident that your CLARK sink will stand the test of time. Our sinks are manufactured from quality stainless steel so you know you're choosing a product that is both hygienic and 100% recyclable. Our extensive range includes solutions for all types of projects and can be paired with matching tapware to create a kitchen or laundry space you will love.

Capacity: 20L(per bowl)

Code: R175MK2.1L (1TH, LHB)
R175MK2.1R (1TH, RHB)

Choosing your laundry sink.

This decision will be based more on your individual needs as much as practical issues, like how much space you have in the laundry. Clark makes the decision easy, with a range of tubs to meet your requirements.

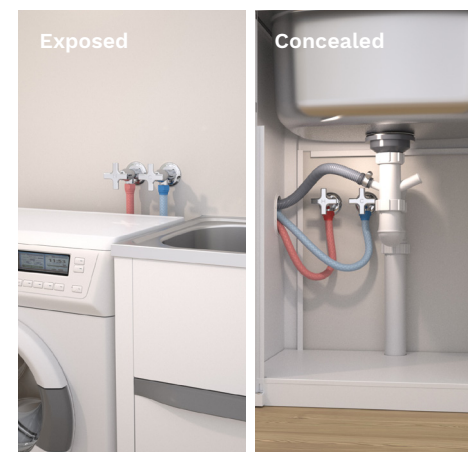

Standard or compact.

Most Clark laundry tubs are available in both standard and compact orientations. Compact tubs are ideal for small narrow areas and cupboard laundries where space is at a premium.

Standard flexible or concealed by-pass

Clark offers both standard flexible by-pass and concealed by-pass options. A concealed by-pass connection hides your washing machine by-pass hose under the bench or in the cabinet for a neat clutter free look.

Exposed or Concealed Taps

Washing machine taps can either be installed exposed above the washing machine or can be cleverly hidden inside the cabinet. All Clark laundry tub and cabinets feature side entry holes which allow for the installation of concealed washing machine taps.

Flushline.

Single 30L Flushline Tub

Standard Size: L380 x W550 x D240 MM
Compact Size: L550 x W380 x D240 MM
